Performance challenge

The challenge: Beginning in the center of the bulls eye, your vehicle will drive over different colors (white, grey, and black). Your vehicle should express itself differently as it drives over each color. For example – it can perform a dance, play music, send IR messages that make something else happen, or anything else expressive. Be creative!

Time Limit: 2 minutes

How to recreate a practice course:

What the course looks like:

Bull's Eye (as shown at right) with a diameter of approximately 43".
