

# robo expo!

## Requirements for Exhibiting

Each school will be provided with a large table to present their exhibition projects. Each table will be labeled with a school name. You are welcome to make additional posters to advertise your school's space at Robo Expo.

Students may exhibit any robot that they have created. For each project, the student must make a poster with the following information:

Student name

School

Grade

Description of the robot and what the robot does

Print out of the programming code

This year we will have a special section in the exhibit area dedicated to the "smart house." We invite everyone to design their own "smart house." This means that we would love to see interesting projects created to accomplish tasks in a house setting (i.e. fans turning on when the temperature is too warm, lights turning on due to movement in the house, etc.). This is not a prerequisite for exhibiting, just a theme to keep in mind!
